NAME
igawk – gawk with include files

SYNOPSIS
igawk [all *gawk* options] **−f** *program-file* [−−] file …
igawk [all *gawk* options] [−−] *program-text* file …

DESCRIPTION
Igawk is a simple shell script that adds the ability to have ''include files'' to *gawk*(1).

AWK programs for *igawk* are the same as for *gawk*, except that, in addition, you may have lines like

@include getopt.awk

in your program to include the file **getopt.awk** from either the current directory or one of the other directories in the search path.

OPTIONS
See *gawk*(1) for a full description of the AWK language and the options that *gawk* supports.

EXAMPLES
cat << EOF > test.awk
@include getopt.awk

BEGIN {
        while (getopt(ARGC, ARGV, "am:q") != −1)
                …
}
EOF

igawk −f test.awk
